Behavior-Based MEWP

SCISSORS LIFT, SKY LIFT, BOOM LIFT
SAFETY OPERATIONS
TRAINING PROGRAM

OVERVIEW

Our Behavior-Based Mobile Elevating Work Platform Safety Operations Training accredited by the American Petroleum Institute and adopted by the ISO Group is an international approach to safety that focuses on safe and unsafe behaviors of staff in the workplace. Its aim is to identify, influence, and change the unsafe behaviors that exist in the workplace, or reinforces the safe behaviors already established. Common MEWP Operations Training only conveys Safety Compliance Rules and Dos & Don'ts.

This program, certified by the American Petroleum Institute is a main requirement for all the industries' personnel whilst working at height. This course provides detailed instruction in the safe use of Mobile Elevating Work Platform (MEWP) in the workplace.

OBJECTIVE

Upon successful completion of the program, trainees would be competently trained to operate their ability regarding MEWP safely as required.
